

Cyber Security Workshop

26 Oct, 2023

A One Day Workshop on Cyber Security is being organized by Commissionerate of Collegiate Education for the benefit of the students. The objective of the program is to prepare the students on how to protect the safety and integrity of the information.

Cyber security is the process of protecting computer systems and networks against the access from unauthorized sources by mitigating information risks and vulnerabilities. Hackers steal trade As the number of organizations are adopting digital transformation the risk of cyber crime is increasing in an exponential way simultaneously cyber crimes and threats have also increasing in the pace. Cyber security is a knight in the shining armour. Government and private institutions are investing heavily into this sort of security to protect their assets as the dependence on IT and technology grows so do the number of cyber attacks have also increased.

Cyber security certification helps you to protect against fraud and online assaults. The advantages of cyber security are protecting personal data, enhancing productivity, assisting remote work place, regulation compliance improving cyber posture better data management, maintain trust and credibility. Students were made to participate in the certificate course and were issued online course completion certificate where they were introduced to the basics of cyber security.

The programme was conducted by A. Sowjanya Lakshmi, Faculty of Computer applications to the students year wise. Final year students were allotted in the morning session. First and Second year students allotted in the afternoon session. Dr. B. Gopal Naik, S. Pavani, A. Sowjanya Lakshmi also got online certificate of participation.
